

# Computer Aided Design

Index to Volume 8, Number 1-4, pages 1-288 ISSN 0010-4485

## A

Advances in computer graphics 66  
Algorithm for evaluation of network transfer functions 264  
Aircraft automation 54  
Airing bearings 63  
Applied optimization and circuit design 70  
Approaches to computer-aided architectural sketch design 181  
APRICOT 149  
Architectural design 181, 287  
ARK 2 - the architectural package 59  
ASAS - general purpose finite element analysis system 2

## Authors

Adamowicz, M *et al* Nesting two-dimensional shapes in rectangular modules 27  
Amkreutz, J H A E Cybernetic model of design process 187  
Beeby, A W *et al* Interactive computer-aided design and DECIDE system 112  
Bolmstedt, U *et al* Simulation of the steady-state and dynamic behaviour of multiple effect evaporation plants. Part I: steady-state simulation 142  
Cockerham, G *et al* Computer-aided design of spur or helical gear train 84  
Eastman, C General purpose building description systems 17  
Ellis, J Johnson's method of optimum design applied to a problem with simple functional relationships 9  
Emmerson, W C CAD in the motor industry: Leyland Cars 193  
Hashemian, R An algorithm for direct evaluation of network transfer functions 264  
Henrywood, R K *et al* ASAS - a general purpose finite element analysis system 2  
Hemmings, K R *et al* CAD in the motor industry: Leyland Truck and Bus 34  
Höglund, I *et al* LSI circuit design 165  
Horii, M *et al* A computer-aided design system for building structures in BUILDING RC/SRC/S' 117  
Hosking, K H Automatic printed circuit board routing with intermediate control of the tracking: APRICOT 149  
Huckle, P *et al* Computer-aided design system for site layout 214  
Humcke, D J Interactive computer graphics 227  
Jerrard, R N Computer-aided design of textiles 239  
Johnson, C *et al* 3D interactive graphics as an aid to the design and layout of equipment 233  
Kestner, W Dialogue system for creating and manipulating graphical symbols and structures 101  
Peleg, K *et al* Container dimensions for optimal utilization of storage and transportation space 175  
Phrydas, C *et al* Network partition methods for use in symbolic analysis by interpolation 157  
Pogacnik, A B Visual-aesthetic components in the cybernetics of urban planning 41

Ricci, R J SPACEBAR: Kinematic design by computer graphics 219  
Richards, C J Uses of computers in technical illustration 94  
Shunmugam, M S *et al* Comparison of different methods for computing the two-dimensional envelope for surface finish measurements 89  
Spence, R Techniques of CAD: Human factors in interactive graphics 49  
Tindall, C E *et al* Computer-aided design and optimization of induction motors 252  
Toakley, A R Elastic-plastic design of unbraced frameworks 77  
Veron, M *et al* Continuity of biparametric surface patches 267  
Watts, G A *et al* Computer-aided design in the non-ferrous metals industry 13  
Webster, G J *et al* The evaluation and selection of a computer system for interactive design 247  
Willey, D S Approaches to computer-aided architectural sketch design 181  
Wilson, H B *et al* Computation of geometrical and inertial properties for general areas and volumes of revolution 257  
Wright, D J *et al* Applied optimization and circuit design 70

Building description systems 17

## C

CACTI system 94

## CAD Centre

Chemical engineering software and the CAD Centre 211  
Consensus emerges on cad systems 211  
Describing mechanical engineering components 139  
GINO-F progress 66  
Oil storage tank design 288  
Seeing is believing 66

Chemical technology 55  
Circuit design 70  
Clustering algorithm 27  
CMOS lsi circuits 165  
Comparison of different methods for computing the two-dimensional envelope for surface finish measurements 89  
Computation of geometrical and inertial properties for general areas and volumes of revolution 257  
CAD in the motor industry: Leyland Cars 193  
CAD in the motor industry: Leyland Truck and Bus 34  
Computer-aided design system for building structures in 'BUILDING RC/SRC/S' 117  
Computer-aided design in the non-ferrous metals industry 13  
Computer-aided design and optimization of induction motors 252  
Computer-aided design system for site layout 214  
Computer-aided design of spur or helical gear train 84  
Computer-aided design of textiles 239  
Computer and Automated Systems Association (CASA) of SME 206  
Computer graphics 66, 198, 276  
Concrete design 112

## Conferences

Computers in engineering and building design 279  
Circuits and systems symposium 281  
PROLAMAT '76 282  
Human and robot behaviour 200  
CAM-i International 136  
Design automation symposium '75 54  
Application of process systems - chemical technology 55  
Workshop on computer-aided design 56

Container dimensions for optimal utilization of storage 175  
Continuity of biparametric surface patches 267  
Cut-away and exploded drawings 94  
Cybernetic model of the design process 187

## D

Damping 63  
Databank 63  
DECIDE system 112  
DEMOS-E 117  
Design automation systems 54  
Design of container 175  
Design management system 139  
Design of textiles 239  
Dialogue system for creating and manipulating graphical symbols 101  
Die design 13  
Displays 64  
Digitized surface profiles 89  
Drag racing 126

## E

Education 274  
Elastic-plastic design of unbraced frameworks 77  
Element analysis 129  
ENPORT 199  
Equipment design 233  
Evaluation and selection of a computer system for interactive design 247  
Evaporation plants 142  
Evolution of design process 187

## F

Finite element analysis system 2  
Fluid flow 206  
Frameworks 77  
Frequency response techniques 133

## G

Gas film damping 63  
Gears 84  
General purpose building description systems 17  
Geometrical and inertial properties 257  
Geometric modelling 136  
GINO-F 66  
Golf club shaft 276  
Graphics 66, 198, 227, 276  
Graphical symbols 94

## H

Heat Transfer and Fluid Flow Service (HTFS) 206  
Human factors 49  
Human and robot behaviour 200

## I

Illustration 94

Induction motors 252  
INDUNS 142  
Inertial properties 257  
Interactive computer-aided design and the DECIDE system 112  
Interactive computer graphics 227

## J

Johnson's method of optimum design applied to simple functional relationships 9  
Joint analysis 128

## K

Kinematic mechanisms 219

## L

Layout 233

Light Pen (inside back cover)  
Gearing for recovery  
Real-time technology and computer aided design  
Satellite systems prepare for take off  
Potential of microprogramming techniques

Linear circuit design 70  
LSI circuit design 165

## M

Mechanical design 9  
Modelling 136  
Motors, induction 252

## N

Nesting two-dimensional shapes in rectangular modules 27  
Network partition methods for use in symbolic analysis by interpolation 157  
Network partition 157  
Network transfer functions 264  
Node-admittance 264

## O

Office layout 276  
Optimization for mechanical design 9  
Optimization methods 287

## P

Perception 49  
Physical property databank 63  
PIP — Pipe Inspection Program 59  
Plotter 64  
Power systems analysis program 60

Printed circuit board 149  
Process synthesis 55

## R

Racing 126  
Reinforced concrete design 112  
Robot behaviour 200

## S

Sculpted surfaces 61  
SEAPOS (structural evaluation and analysis package for offshore structures) 209  
Ship design 275  
Shoe pattern layout 278  
SIBAS — portable database management 60  
Simulation of chemical processes 275  
Simulation of the steady-state and dynamic behaviour of multiple effect evaporation plants. Part I: steady-state simulation 142  
Site layout 214  
SPACEBAR: Kinematic design by computer graphics 219  
Spur and helical gears 84  
Steel frameworks 77  
Structural design of buildings 117  
Surfaces 61, 89, 267  
Surface finish 89  
System requirements for development 247  
Systems symposium 281

## T

Technical illustration 94  
Techniques of CAD: Human factors in interactive graphics 49  
3D Interactive graphics as an aid to the design and layout of equipment 233  
Textiles 239  
Tooling design 13  
Tubular joint analysis 128  
Two-dimensional layout 27  
Two-dimensional steel frameworks 77

## U

Urban planning 41  
Uses of computers in technical illustration 94

## V

Visual-aesthetic components in the cybernetics of urban planning 41

## W

Wire-line diagrams 233
